

## Enhance™ 0886 Grease #2.5

---

### Description:

Enhance™ 0886 Grease #2.5 is an outstanding multi-purpose, extreme pressure (EP) Lithium Hydroxy grease. This product is recommended for extended service in heavy duty automotive, trucks, buses, farm tractors and construction equipment. The low bleed characteristic is particularly used in poorly sealed bearings. Enhance 0886 Grease #2.5 can also be used in lubricating many types of industrial machinery where poly-lithium-EP grease is specified.

### Applications:

Highly recommended for chassis, universal joints, wheel bearing and other lubrication points for trucks, farm tractors, construction equipment and automobiles. Its multi-purpose capability usually eliminates the need for the other grease, thus avoiding the danger of misapplication of mixing greases of different base types.

### Typical Properties:

Enhance™ 0886 Grease #2.5	
NLGI Consistency Number	2
Soap Type	Lithium-12 Hydroxy
Soap, %	7-11
Color	Amber
Appearance	Semi-solid
Worked Penetration	280
Dropping Point °F	360
Timken EP Test, OK load, lbs	45
Four Ball WP Weld Point, kgf	250
Four Ball Load Wear Index, kgf	50
Viscosity @ 40°C, cSt	182
Viscosity @ 100°C, cSt	15.4
Viscosity SUS @ 100°F	963
Viscosity SUS @ 210°F	81
