

Enhance™ Industrial EP Gear Oil

Description:

Enhance™ Industrial EP Gear Oils are premium extreme pressure (EP) gear lubricants formulated to provide optimum performance and protection in nearly all types of enclosed gear sets.

These oils are blended with selected grades of high-viscosity index and thermally stable paraffinic base stocks and fortified with an advanced additive system designed to deliver ultimate protection against gear and bearing wear, rust, oxidation, and hydrolytic decomposition. With a chlorine-free formulation, disposal will remain worry-free.

This product is formulated with premium paraffinic base stocks for added resistance.

Benefits:

- Ultimate Resistance to Rust and Oxidation
- Maintains Excellent Water Separating Properties
- Outstanding Wear Protection
- Non-Corrosive to Copper, Brass, & Bronze
- Long-Lasting Gear Protection Due to Extreme Pressure Additives
- Active Anti-Wear Agents Help Protect the Critical Gear Components

Typical Properties:

| Enhance™ Industrial EP Gear Oil | | |
|---------------------------------|-----------|-----------|
| ISO Grade | 150 | 220 |
| AGMA Number | 4 EP | 5 EP |
| Color | Amber | - |
| Pour Point, °C (°F) | -11 (12) | -9 (15) |
| Flash Point, °C (°F) | 227 (441) | 238 (460) |
| Viscosity Index | 100 | 100 |
| Viscosity @ 40°C, cST | 152.2 | 220.0 |
| Viscosity @ 100°C, cST | 15.2 | 19.4 |
| API Gravity @ 60°F | 28.7 | 28.0 |
| Color, ASTM | <4.0 | - |
| Timken, OK Load, lbs. | 65 | - |
