

Enhance™ Saw Guide Oil

Description:

Enhance™ Saw Guide Oils are premium quality oils specially designed and tested for modern multi-blade, gang saws and edgers. This saw guide oil is formulated to provide optimum tackiness and reduced friction for increased recovery rates and sawmill productivity.

This product is environmentally friendly by being inherently biodegradable. The dioxin formation and environmental concerns are reduced due to low levels of dioxin precursors.

Applications:

Saw guide oils are specially formulated to lubricate the multiple saws and guides of modern arbor edgers. The 100 is recommended for use in arbor edgers (horizontal, vertical, single, or double configurations), curve saws, and thin kerf gang saws manufactured by Ukiah, Kockums-Cancar, Schurman, Newnes, Optimil, McGehee, and CAE.

Typical Properties:

Benefits:

- Superior Tackiness
- Less Wash-Off and Better Lubricity
- Reduces Oil Consumption, Pitch Build-Up, Energy Costs, Heat Build-Up, and Saw Deviation
- Helps Increase Productivity, Save Money, and Contribute to Greater Sawmill Profitability
- Reduces Friction and Metal-To-Metal Contact
- Helps Reduce Wear and Heat Build-Up for Both Saw Guides and Blades, Minimizing Saw Deviation and Maximizing Recovery
- Fewer Saw and Guide Changes, Longer Cutting Cycles, Less Unscheduled Maintenance, and Lower Operating Costs
- Anti-Rust Additive Keeps Blades Cleaner Helping to Increase Saw Life

Enhance™ Saw Guide Oil	
Density, kg/L @ 15°C	0.864
Pour Point	-36°C (-33°F)
Flash Point	268°C (514°F)
Viscosity Index	128
Viscosity @ 40°C, cST	110
Viscosity @ 100°C, cST	14.0
